

ES-Open 2018 soapbox

D1M - IC-718, ANT DIPOLE 3.5Mhz

DJ6TK - Only a short test

ES00 - 5m lipumasti otsa tõmmatud inv. V 80/40 ühe feedpointiga, Yaesu ftdx-1200

ES1ACS - Inverted V. 100W. There was shity propagation. TU ALL who answered my call. Tänud küigile kes vastas!

ES1BH - Propagation was very bad.

ES2QX - TS850SAT 100W ristatud puu otsas krussis diipolid

ES5NHC - Algul oli levi kehvapoolne, pärastpoole paranes. Paraku lõppes minu jaoks võistlus kolmveerand tundi enne õiget aega, kuna väljas olnud tormine ilm viis kodust elektri.

ES5O - Inverted V, UW3DI ~65W

ES6O - Thanks for everybody to response my call. Propagation was so bad in 40, but at least I do my thing in 80. In-V 10m above ground and Yaesu FT-847 Pw.100W TU - 6ME

ES7A/2 - Inv. V. 80/40m, ICOM-706MK2G 100w

ES7GM - Fun contest as always. Similar results like last year. Good propagation from outside ES. Happy to see several familiar call signs. Like every year I used 2x IC-775DXII, 2x PA, 2x 80/40 inv.v antennas.

EU8F - 73

EW8DX - TNX

LA9RY - Worked with 100W and a G5RV 12m up. Not many stations to hear, and propagation to ES not good. In addition to that I have a hill on the ES-side of my antenna. Just five Qs during 1 hour and 45 minutes. Next time from a different QTH.

OH5ZA - Nice contest but activity mostly on 7 MHz, where the skip was too long from Southern Finland. It was very quiet on 3.5 MHz for very long periods... Had to leave for a celebration after 0645Z... Cheers/73, Zaba OH1ZAA

OK2BOB - My rig: IC706 70W, ant. LW 10 mtrs on balcon at 2nd floor.

ON3ND - Not the best time for me... 73 to all entrants !

R6CW - TS-590S - 100watts ant - loop

RN3S - Icom 760Pro, Inverted V 40/80, Sloper 20m, Sloper 15m

RV3DBK - 5W MAGLOOP ANT.

SA5HUB - ES-OPEN CLASS B

SP4Z - No 136 number QSO - lost during period change

SV1AJ0 - BEST REGARDS. 73!! SV1AJ0

UA3AAJ - 100W, 25m sloping wire. Thanks to all participants.

UR5KBP - UR5KBP@gmail.com, TRX home made 5W, ant Delta 7MHz

YL1ZT - Technical problems!

YL2AQ - ES-Open 21.04.2017.

YL3AD - THIS CGLOG VERSION DOES NOT RECOGNISE "D" CATEGORY (SO-MIX-LP) YET, BECAUSE I'M TRYING TO ASK FOR YOUR SUPPORT FOR IT :). 40M BAND WAS VERY DIFFICULT TO REACH BUT FIND HOW TO GET SOME QSO'S ON IT. THANKS FOR NICE COMPETITION! 73! JANIS, YL3AD

YL3GAO - TRX=TS870, ANT=Delta Loop 80M, TNX for Contest!
