

## ES OPEN 2021 SOAPBOX

### ES1LL

Thanks for the contest ! Worked from the city lot. QRM on 40m was 53, but on 80m was 59 :(  
Greetings from Tallin !

ic-706MKIIG delta loop 80m 73!

### ES2MC

Peaks olema minu läbi aegade suurim sidearv selles testis! Aga kahjuks oli Eesti aktiivsus vähene, mitu kordajat jäi puudu!

### ES5EP

### LA2GKA

Not the best of conditions to-day with a K-Index in the 5 area and all predictions for the HF bands in the red (poor). Although my first QSO was on 80 m all the rest were on 40 m, at least some activity in the lower sode (7150 to 7200). Last year I had a total of 40 QSO so 29 to-day, conds taken into cinsideration, may not be that bad.

### OH1SIC

Bad conds. 73 de OH1SIC/SM5SIC Göran

### OH5ZA

One hour before the contest Aurora peaked 65 GW. During ES-open hovering between 55 - 35 gigawatts most of the time... No 7 MHz skip to Estonia... Cheers/73, Zaba OH1ZAA
