

ES VUSHF FD Soapbox 2021

SK0EN

Good tropo across the Baltic sea. Worked all stations heard on 23cm.

SM7LCB

Hej, nice conds as it shall be during this contest but there have been better times. But nice result on 23 cm and then I was active a bit on 2 m with my QRP station and also 70 cm with a yagi outside op-site. Very nice with good activity on 23 cm and I hope you will arrange same nice conds coming years during this contest.

OH4MVH

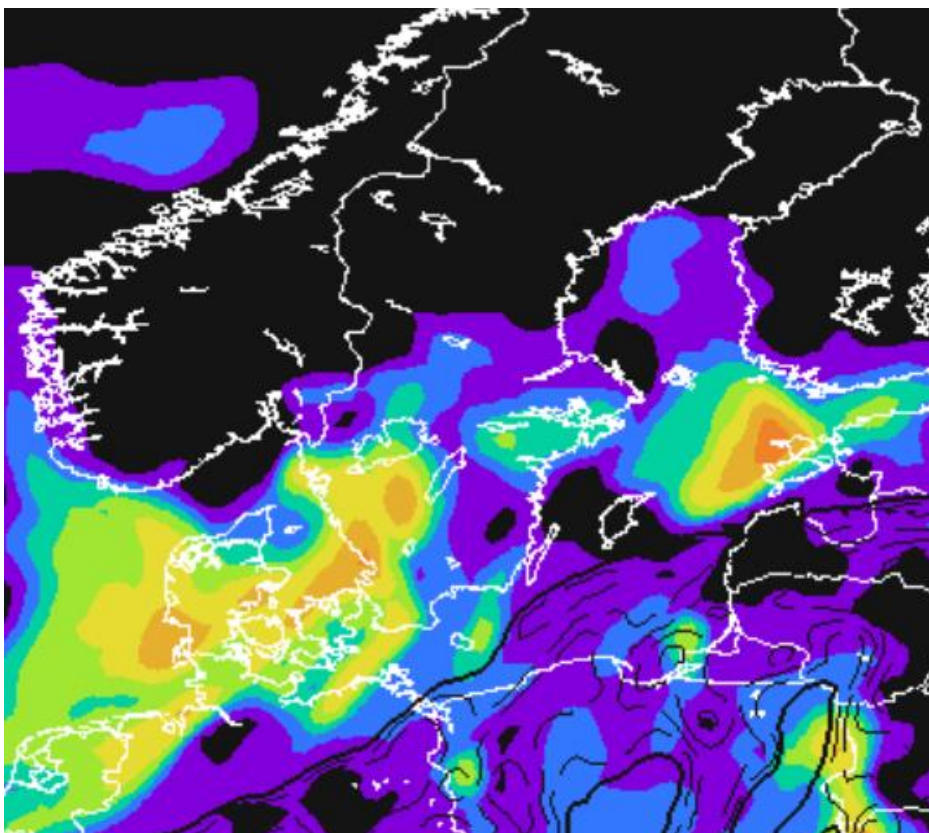

Just got 70cm setup working b4 contest with slightly reduced output pwr and no preamp. Worked also abnormal remote setup, so my reception was not similar what I'm used to in my home QTH. Rig VCO unlock issue due to high temp prevented my participation on other bands. Tnx for all contacts!

SP2IQW

For a long time there have been strong QRN in the evenings lasting into the morning, and this is what happened after half an hour of the first leg. Thanks to the aggressive NB and NR settings of IC-9700 and fairly good propagation, I managed to make these dozen of QSOs.

ES2NJ

Tropo ennustuse kaart 17.juuli hommik, 23cm tuuri ajaks.

YL1ZF

This year more QSOs in the log in total, more ES in the log on six and even managed to make two contacts on 70 MHz. Total score went up by approx 1/3, but second year in a row missed ES for a country on 4m band. QSO split per mode CW/SSB/DIGI was almost equal.

RIG: IC7300

ANT: 4+4 el short boom dualbander @18m (close to sea coast AGL/ASL about the same)

ES8OV

Osalesin välipäeval lagedal põllul ergava päikese all. Välipäeva ilm oli ideaalne, +24C, pilvitu taevas. Levi oli 432 tuuri ajal keskmine, 144 tuuri ajal aga super.

ES3X

Meie 6 ja 4m testi kokkulangemine CQWWVHF contestiga teeb asja kahtlemata huvitavaks - kui viime välipäeva augustisse, siis sellist "pidu" enam pole... Aga 23cm ja 70cm olid paraku lahjad ja ei väärinud kogu seda pingutust, mis niisuguste set-up'ide püsti ajamine siiski paratamatult on. Õhtune 2m tuur oli isegi enam-vähem, kuigi levi oleks lubanud palju enam. Lihtsalt aktiivsust ei ole... Äkki tuleval aastal uut moodi, hi?!
