

Välipäeva kommentaare

ES1CW

Uskumatu kogemus! FT-736R võttis käte ja pakkus üllatuse vahetult enne testi algust ja muidugi ka kogu testi väitel. Lihtsalt otsustas meelde tuletada neid vanu aegu, kui vastuvõtuks kasutati superregenatiiv-vastuvõtja ehk siis nagu muiste - VFO nuppu keerata pole vaja, köik jaamat on kuulda korraga sõltumata sellest, millisel sagedusel ka nad iganes on! Kes tugevam, see võidab. Ja üüratu tundlikus mõned minutid... Kõik vastuvõetavad signaalid 59a... Ja korrespondentidel minu jaama vastuvõtul ligilähedaselt samad probleemid - saatja kärisev signaal üle platsi. Et tee siis kindlaks, kus on see õige ES1CW RX/TX sagedus on... Kahjuks korrespondendid ei teadnud arvata, et sellel täpsel pealehäälestamisel ei olnudki mingi mõtet - oleksin niikui nii kuulnud kui kutsutakse +/- 50kHz alas... Ainus kuulduteest, kellele ei saanud pihta, oli hirmkõva SM7LCB. Tsiviliseeritud kõrvale oli selline karvane signaal ilmselt liig mis liig... Aga pole hullu - järgmine kord paremini!

6m oli peaegu loterii – esineliku kohtade järjestuse muutmiseks oleks olnud vaja ühel neljast teha vaid üks lisa Es-QSO... Enda viga ma tean, aga konkurentidele ei ütle, hi.

ES1WST

Thanks for the opportunity to work this contest. I'm totally inexperienced with VHF/UHF, but I really enjoyed it. My home call is WS4T and I received the call ES1WST on July 21, 2009. My xyl is Estonian and we are living at her mother's house in Tallinn near Kopli Bay. We had plans to go to Saaremaa for the contest, but unfortunately her mother was ill and we stayed in Tallinn instead.

I set up my station in the garden of our house and operated from there. I have fairly limited equipment and I was still soldering coax and setting up my antenna in the first hours of the contest. With only battery power (NiMH / alkaline cells), I couldn't afford to call CQ. But I was happy to make a few contacts at least. I hope to be back for next year's contest too. I'm attaching a couple of pictures of my station (too many trees, buildings and apples...).

ES2MC

"Passiivselt" kasutatud DX-clusterit internetis. Töötatud statsionaarsetes tingimustes kodusest QTH-st. Esimene proov uue mastiga ja set-up'iga...

ES3RBU

2m ja 70cm pani Murphy oma karvase käe mängu, aga 23cm oli viimase peal. Levi pooltest oleks võinud veelgi kesta.
Nüüd kähku järgmise aasta pille timmima! Hi!

SK3MF

Nice condx again. Sorry our amplifier did break down after 10 minutes, but we managed quite good with 25 watts. Looking for next years contest Rolf/COL

SM0DFP

We had excellent conditions with extreme strong signals. Some ES stations were so strong that they caused my RX to have large signal problems, Unfortunately I had to go QRT early due to other family comitments. Vy fun contest, hope to be active also on microwaves next year.

SM7LCB

Hej,

Nice condx during this ES OPEN FD contest on 1296 MHz. Good activity from both ES, YL and LY! This was my first contest with my new antenna for 23/13/9cm. It is a 1.9 m dish with a ringfeed.

Hope to have audio clip on my home page (<http://sm7lcb.shacknet.nu>) soon it anyone want to listen in. I also hope that were will be similar condns next year so cul in 2010.

73 de ULF/SM7LCB

SP2IQW

Very good tropo conditions over Baltic sea up to JP93, KP02 sqrs. Unfortunately not so many stations turned antennas into SP dir. ODX 994km with SM2GCR in JP93tk but w/o QSO-nr exchange so not logged.

ES0TJC

Võistluse ajal ei kasutatud interneti abi clusterite jm. suhtluskanalite näol.

ES1AO

Ilm oli laagerdamiseks imehea ja lõbu laialt. Levi oli (pigem üli-)hea. Avastasin uue QRM allika: päramootoriga langevarjurid (motovarjurid), kes ilusa ilmaga ranna kohal tiirutasid ja kelle QRM (ragin S9+40dB) levis ~5 km kaugusele. Antenni suund ei mänginud selle juures pea mingit rolli....

ES1LBK/0

No internet, no spots, no skeds = in the wild!

LY2WR

Thanks for nice and unique VUSHF Contest,
73 to all!!

SM3BEI

Hello Boys! Condx realy UFB !! but not in the MW-section, Viljo can tell U HI! CU next year !!
Lennart – SM3BEI

YL2PJ

My first experience on VHF/UHF. Tnx for nice contest.
73!

ES2U

Very nice propagation during 1G3 contest: strong and steady signals from every direction.
CU in next Year contest.
